

## Government Degree College: SALUR

### Waste Management

### Solid waste Management

(Collection of Solid Waste)

We have engaged two sweepers for the college cleaning purpose regularly such as class rooms and laboratories and office rooms, we have a total of 18 class rooms and 6 laboratories and 2 office rooms, they cleaned above mentioned all in daily basis, and waste from all the branches are dumped at located pits in the campus, the that waste was handed over to the SALUR Municipality in week wise.

Remuneration of the above sweepers received from the college funding.

### **Liquid Waste Management**

### **(Collection of Liquid Waste)**

The collection and management of liquid waste, also known as wastewater or sewage, is an essential process for maintaining public health and protecting the environment. There are various methods and systems in place to collect and treat liquid waste, depending on the scale and infrastructure available in a particular area. Here are some common methods of liquid waste collection

Soak pits (water Harvest Structure): In Govt Degree College Salur we Constructed two water harvest structures at old building, A Water Harvest Structure is an underground chamber that collects and partially treats liquid waste from a College building. The tank allows solids to settle and decompose while allowing the liquid effluent to flow out for further treatment or dispersal into the ground.

## **E-waste Management**

(Collection of e\_waste)
